For the given database, perform the following tasks using MongoDB.

• List all orders with the product name “Chocolade”.

1. I have used the command :

db.product.find({ProductName:"Chocolade"})

```
> db.product.find({ProductName:"Chocolade"})
< {
    _id: ObjectId('67f4d96aa2bebad1f2cc4790'),
    ProductID: 48,
    ProductName: 'Chocolade',
    Category: 3,
    QuantityPerUnit: '10 pkgs.',
    UnitPrice: 12.75,
    UnitsInStock: 15
  }
order>
```

• Find all employees who are “Sales Representatives” and belong to country “USA”.

2. I have used the command :

db.employee.find({ Title: "Sales Representative", Country: "USA" });

```
db.employee.find(
  { Title: "Sales Representative", Country: "USA"
);
{
  _id: ObjectId('67f4d8f4a2bebad1f2cc46ab'),
  EmployeeID: 1,
  LastName: 'Davolio',
  FirstName: 'Nancy',
  Title: 'Sales Representative',
  BirthDate: '1948-12-08',
  HireDate: '1992-05-01',
  Address: '507 - 20th Ave. E.\n' +
    'Apt. 2A',
  City: 'Seattle',
  Region: 'WA',
  PostalCode: '98122',
  Country: 'USA',
  HomePhone: '(206) 555-9857',
  ReportsTo: 2
}
{
```

• Write a query to increment the stock quantity of all products by 10.

Before applying the query

```
_id: ObjectId('67f4d96aa2bebad1f2cc4764')
ProductID : 4
ProductName : "Chef Anton's Cajun Seasoning"
Category : 2
QuantityPerUnit : "48 - 6 oz jars"
UnitPrice : 55
UnitsInStock : 53
UnitInStock : 0
```

3. I have used the command :

db.product.updateMany({}, { $inc: { UnitInStock: 10 });

```
> db.product.updateMany(
    {},
    { $inc: { UnitInStock: 10 } }
  );
< {
    acknowledged: true,
    insertedId: null,
    matchedCount: 77,
    modifiedCount: 77,
    upsertedCount: 0
  }
```

<u>After applying the query</u>

```
_id: ObjectId('67f4d96aa2bebad1f2cc4764')
ProductID : 4
ProductName : "Chef Anton's Cajun Seasoning"
Category : 2
QuantityPerUnit : "48 - 6 oz jars"
UnitPrice : 55
UnitsInStock : 53
UnitInStock : 10
```

• Update the UnitPrice of Product "Chef Anton's Cajun Seasoning" to $55.

<u>Before applying the query</u>

```
_id: ObjectId('67f4d96aa2bebad1f2cc4764')
ProductID : 4
ProductName : "Chef Anton's Cajun Seasoning"
Category : 2
QuantityPerUnit : "48 - 6 oz jars"
UnitPrice : 22
UnitsInStock : 53
```

4. I have used the command :

db.product.updateOne({ ProductName: "Chef Anton's Cajun Seasoning" }, { $set: { UnitPrice: 55 } });

```
db.product.updateOne(
  { ProductName: "Chef Anton's Cajun Seasoning" },
  { $set: { UnitPrice: 55 } }
);
{
  acknowledged: true,
  insertedId: null,
  matchedCount: 1,
  modifiedCount: 1,
  upsertedCount: 0
}
```

<u>After applying the query</u>

```
_id: ObjectId('67f4d96aa2bebad1f2cc4764')
ProductID : 4
ProductName : "Chef Anton's Cajun Seasoning"
Category : 2
QuantityPerUnit : "48 - 6 oz jars"
UnitPrice : 55
UnitsInStock : 53
UnitInStock : 10
```

- Delete all orders with no discount.

5. I have used the command :

db.orderdetails.deleteMany({ Discount: { $eq: 0 } });

```
> db.orderdetails.deleteMany(
    { Discount: { $eq: 0 } }
  );
< {
    acknowledged: true,
    deletedCount: 55
  }
```
